

Tableau Maps-Additional Practice

Use the Filled_Maps_Starter.wbx starter file.

Create a view that shows Order Quantity by zip code on a map of Seattle as per the following specifications:

- Use a filled map to show Order Quantity by color for each zip code (Postal Code) in Seattle.
- Show streets and highways in the view, and uses 40% transparency for the color of the marks so the streets and highways are easy to see.
- Includes a Postal Code quick filter for selecting which Seattle zip code to highlight.

Final Screen should look as follows:
